MD SHEMON MIA

SOFTWARE ENGINEER

Dhaka, Bangladesh | +8801893323599 | shimonahamed99@gmail.com
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in full-stack web application development, backend engineering, RESTful API development, database design, and enterprise software solutions. Experienced in developing and maintaining production-ready applications using PHP, Laravel, Node.js, Express.js, Vue.js, React.js, Bootstrap, MySQL, and MongoDB. Skilled in integrating third-party services including online payment gateways, SMS and bulk SMS gateways, and email services. Strong understanding of API integration, database optimization, debugging, authentication, scalable application architecture, and collaborative software development workflows.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript (ES6+), SQL
Backend & Frameworks: Laravel, CodeIgniter, Node.js, Express.js
Frontend: Vue.js, React.js, Bootstrap, HTML5, CSS3
Databases: MySQL, MongoDB
API & Development: RESTful APIs, API Integration, JWT Authentication, Database Schema Design, Query Optimization
Third-Party Integrations: Online Payment Gateway Integration, SMS & Bulk SMS Gateway Integration, Email (SMTP) Integration
Testing & Tools: PHPUnit, Postman, Git, Debugging

PROFESSIONAL EXPERIENCE

Junior Software Engineer — *TMSS ICT Ltd., Dhaka, Bangladesh* **May 2025 – Present**

- Develop and maintain full-stack web applications using PHP, Laravel, Node.js, Vue.js, React.js, and MySQL.
- Design, develop, and integrate RESTful APIs using Laravel and Express.js for client-server applications.
- Integrate online payment methods, SMS and bulk SMS services, and email notification systems into web applications.
- Develop backend services, database schemas, and optimized queries using MySQL and MongoDB.
- Build responsive and user-friendly interfaces using Vue.js, React.js, Bootstrap, and modern JavaScript.
- Debug application issues, optimize performance, and implement reliable software solutions for production environments.
- Collaborate with development and QA teams using Git to deliver and maintain production-ready features.

Intern Developer — *TMSS ICT Ltd., Dhaka, Bangladesh* **November 2024 – April 2025**

- Assisted in developing enterprise web application features using PHP, Laravel, Vue.js, and MySQL.
- Implemented and tested RESTful API endpoints and integrated backend services with frontend applications.
- Performed debugging, bug fixing, database operations, and application maintenance.
- Assisted with database schema design, query development, and code improvements.
- Collaborated with senior developers to understand and apply software development best practices.

Intern — *TMSS ICT Ltd., Dhaka, Bangladesh* **July 2024 – October 2024**

- Gained practical experience in software development and web application maintenance.
- Assisted with frontend development, basic backend tasks, and database operations.
- Supported developers in debugging, testing, and maintaining application modules.
- Worked with development tools and followed standard software development practices.

KEY PROJECTS

Multi-Vendor E-Commerce Platform

Technologies: PHP, Laravel, Vue.js, Bootstrap, MySQL

- Developed and maintained a live multi-vendor e-commerce platform supporting product management, customer interactions, and business operations.
- Developed backend functionality and RESTful APIs using Laravel and PHP.

- Integrated online payment methods to handle secure order transactions and payment status updates.
- Built responsive frontend interfaces using Vue.js and Bootstrap.
- Designed and optimized MySQL database structures and queries to support application performance and scalability.

School & College Management System

Technologies: PHP, Laravel, Vue.js, MySQL

- Designed and developed a comprehensive school and college management system for educational administration and academic operations.
- Implemented modules for student records, administrative processes, and academic workflows.
- Implemented SMS, bulk SMS, and email notifications for students and guardians, such as notices and alerts.
- Developed backend services using Laravel and PHP with Vue.js-based frontend interfaces.
- Designed database structures and queries using MySQL.

College Management System (SaaS)

Technologies: PHP, Laravel, Vue.js, MySQL

- Built a multi-tenant cloud-based SaaS application for college administration and academic management.
- Developed features for centralized data management, academic workflows, and course scheduling.
- Implemented backend functionality using Laravel and PHP with Vue.js frontend components.
- Designed and managed MySQL database structures for multi-tenant application requirements.

University Management System

Technologies: PHP, Laravel, Vue.js, MySQL

- Developed a university management platform for managing academic records and institutional administrative workflows.
- Implemented backend functionality and business logic using PHP and Laravel.
- Developed frontend interfaces using Vue.js and integrated them with backend services.
- Designed database schemas and optimized queries using MySQL.

ADDITIONAL PROJECT EXPERIENCE

Experienced in developing software projects using Node.js, Express.js, React.js, and MongoDB, in addition to PHP, Laravel, Vue.js, and MySQL-based applications.

EDUCATION

B.Sc. in Computer Science & Engineering (CSE) — Northern University Bangladesh **2024**

Diploma in Computer Science & Technology — TMSS INSTITUTE OF SCIENCE & ICT (TISI) **2020 | CGPA: 3.62 / 4.00**

Secondary School Certificate (SSC) — Sonahata High School **GPA: 3.56 / 5.00**
